

Travel Agency ERD diagram Week-2 Homework 3

ilhan koral | January 24, 2020

I removed option change userName. it was really overkill. Now userName is PK.

Reservation date align with trip date range. Prices are tricky, it can be stored seperate, together (trip, accomadation, transportation can be seperated or together.

I wwould store whole price in trip not seperate but it is arguable

it should be a control mechanism. User can book hotel only int the his/her destination city

Reservation -> trip ->package -> destination
