on purpuse. I created contact table

or more table.

seperated. Otherwise current form can be

add in the future more phone number or more email, social media account can be

added. Then contact info can be grow one

merged with customer table. Customer may

To scale out I stopped here. Otherwise reservaton details could be added. Guest name age, accomadation.

I assume each customer can make reservation for one city. Again shirnk the scope. Other wise may be three layered reservation is ncessary. Whole vacation duration, different city may be same date two different city etc.
